

## Hill Approved as Provider for New Energy Programs

The Hill Group was recently approved to provide energy auditing services for two separate energy efficiency programs. A summary of each program is noted below:

### ComEd Smart Ideas Facility and System Assessments

Energy auditing services are being provided for building owners in the ComEd service delivery area through a new rebate program. The cost of energy auditing services is shared by the owner and ComEd with a \$5K commitment from the building owner. The owner can get the \$5K back if project implementation results in a minimum of \$10K worth of other ComEd rebates. The owner must be a non-public entity, have a 500 KW minimum peak demand and receive delivery from ComEd.

### Cook County Energy Efficiency Conservation Block Grants

Any facility, public or private, in Cook County that resides in city with a population of less than 35K is eligible to receive a FREE energy audit through this program. The program is being administered through The Delta Institute and will be available through September 2011. The ARRA funded project is expected to pay for over 100 building audits. Currently, audits have been completed for approximately 50 facilities.

The goal of participating in these programs is to build owner relationships and secure comprehensive building upgrades.

Please contact Hill Senior Project Engineer Teri Lewand at 847.451.5031 for more information on these programs.
